## Business Summary

D. Gillette Industrial Services, founded in 2002, is an SBA 8(a), third generation WBE (Women’s Business Enterprise). DGI specializes in the design, fabrication, repair, and assembly of parts and equipment for the lifecycle sustainment of military customers’ assets. Another core focus is in the area of obsolescence solutions. With over thirty years of experience, DGI serves both the commercial and defense industries with a commitment to providing quick lead times, cost savings, and the highest quality products in order to meet and exceed customer expectations.

## Core Capabilities

## Customers

## Capabilities Continued

### Existing Equipment Life Management (EELM)

- Parts usage & extended life traceability
- Parts room database development planning

### Engineering Services

- Design
- Technical support services
- SOP development
- Maintenance enforcement
- Prevention measures
- Reverse engineering
- Testing plans & procedures

### Manufacturing Solutions

- Additive manufacturing
- Prototype development
- Tooling design
- CNC precision machining solutions
- Turning, milling
- Mig, tig, stick welding

### Reverse Engineering & Prototype Development

- Advanced measurement
- 3D surface modeling
- Materials testing
- Mechanical, physical and electronic properties testing
- Production process documentation

### Lifecycle Sustainment

- Data & technical packages
- Manufacturing level drawings
- New material development
- Analysis & testing plans

### Component Revitalization

- Electromagnetic cleaning process

### Program Management

- Risk management
- Quality assurance
- Configuration management

### Sample Products

- Pallets, skids, boxes, desks
- Clean room benches, lockers
- High barrier pouches packaging

### Additional Capabilities

- Remediation services
- Clean room fabrication
- O&M manuals
- ILS technical manuals
